## Projects

Oct. **Real Estate Auditing**, *Carnegie Mellon University*

2021-Dec. I am providing statistical help (e.g. data analysis, writing expert reports, etc.) for a lawsuit against Allegheny County concerning their practices for computing the assessed values (and consequently property taxes) of newly purchased homes. This was in collaboration with Barbara Stern, John Silvestri, Esq., and Prof. Aaditya Ramdas. Recent news coverage of the case is linked [here](#).

## Industry

May-Aug. **Research Intern**, *Microsoft Research*, Redmond, WA

2023 Team: *Reinforcement Learning*. Mentor: Paul Mineiro. I developed an anytime-valid method that uses active learning for calibrating the risk of black-box machine learning models [?].

Mar.-May **Consultant**, *Growthbook*, Remote

2023 I consulted on a project for implementing safe anytime-valid inference (SAVI) methods into Growthbook's A/B testing engine. A description of the implemented methods is linked [here](#) and the open source implementation is [here](#).

June-Aug. **Engineering Intern**, *Twitter*, Remote

2022 Team: *Experimentation Data Science*. Mentors: Luke Sonnet, Umashanthi Pavalanathan. Manager: Brent Cohn. I analyzed use of safe-anytime valid inference (SAVI) methods for A/B testing.

May-Aug. **Science Intern**, *CTRL-labs (now part of Facebook Reality Labs)*, New York

2018 I developed state-of-the-art LSTM ensemble model that models hand movement from electromyography (EMG) signals in **TensorFlow**.  
Built parser for constructing acyclic graph pipeline for preprocessing real time EMG signals.

May-Aug. **Software Engineering Intern**, *Bloomberg*, New York

2017 I worked on the Message Infrastructure team, where I imported RapidCheck, a Haskell QuickCheck inspired testing framework, into the Bloomberg **C++** environment.

May-Aug. **Software Engineering Intern**, *PicMonkey*, Seattle

2016 I helped build the user interface and photo editing features for the launch of the mobile photo editor app in both **Android** and **iOS**.
