Projects

- June **Multiple Testing/Post-selection Inference**, *Carnegie Mellon University*
- 2020–Present I am developing methods for post-selection inference [10] and multiple testing [4, 5, 9]. I am advised by Prof. Aaditya Ramdas.

- Oct. **Real Estate Auditing**, *Carnegie Mellon University*
- 2021-Dec. I am providing statistical help (e.g. data analysis, writing expert reports, etc.) for a lawsuit against Allegheny County concerning their practices for computing the assessed values (and consequently property taxes) of newly purchased homes. This was in collaboration with Barbara Stern, John Silvestri, Esq., and Prof. Aaditya Ramdas. Recent news coverage of the case is linked [here](#).
- 2022 Jan. **Memory Bounded Experts**, *Carnegie Mellon University*
- 2020-Jan. I proved theoretical bounds on space complexity in the streaming setting for the experts problem. This project is in collaboration with Vaidehi Srinivas, Prof. David P. Woodruff and Dr. Samson Zhou. We published our work at STOC 2022 [3].
- 2021 Jan. **Robust Classification**, *Carnegie Mellon University*
- 2019-Sep. I worked on theoretical understanding of weighted classification methods, and developing an algorithms robust to changes in class weighting. I was advised by Dr. Justin Khim and Prof. Pradeep Ravikumar in this area. Our work was accepted for publication at ICML 2020 [6].
- 2020 Jan. **Machine Translation**, *Carnegie Mellon University*
- 2018-Aug. I used **PyTorch** to train a neural constituency parser as a data augmentation technique for neural machine translation models. I also used **DyNet** to train neural seq2seq models for translating obfuscated code into human-readable code. I was advised by Prof. Graham Neubig.
- 2019 Jan. **Dialog Agents**, *Carnegie Mellon University*
- 2016-Oct. I researched crowdsourcing strategies for gathering dialog data using Amazon Turk. I also contributed to building a dialog agent that was the first to use reinforcement learning in a non-task specific setting. I was advised by Prof. Zhou Yu and our work was published at SIGDIAL 2016 [7] and the RE-WOCHAT workshop at LREC 2016 [8].
