## **Projects**

- Oct. Real Estate Auditing, Carnegie Mellon University
- 2021-Dec. I am providing statistical help (e.g. data analysis, writing expert reports, etc.) for a lawsuit against Allegheny
  - 2022 County concerning their practices for computing the assessed values (and consequently property taxes) of newly purchased homes. This was in collaboration with Barbara Stern, John Silvestri, Esq., and Prof. Aaditya Ramdas. Recent news coverage of the case is linked here.

### Industry

- May-Aug. Research Intern, Microsoft Research, Redmond, WA
  - 2023 Team: Reinforcement Learning. Mentor: Paul Mineiro. I developed an anytime-valid method that uses active learning for calibrating the risk of black-box machine learning models [1].
- Mar.-May Consultant, Growthbook, Remote
  - 2023 I consulted on a project for implementing safe anytime-valid inference (SAVI) methods into Growthbook's A/B testing engine. A description of the implemented methods is linked here and the open source implementation is here.
- June-Aug. Engineering Intern, Twitter, Remote
  - 2022 Team: Experimentation Data Science. Mentors: Luke Sonnet, Umashanthi Pavalanathan. Manager: Brent Cohn. I analyzed use of safe-anytime valid inference (SAVI) methods for A/B testing.
- May-Aug. Science Intern, CTRL-labs (now part of Facebook Reality Labs), New York
  - 2018 I developed state-of-the-art LSTM ensemble model that models hand movement from electromyography (EMG) signals in **TensorFlow**.

    Built parser for constructing acyclic graph pipeline for preprocessing real time EMG signals.
- May-Aug. Software Engineering Intern, Bloomberg, New York
  - 2017 I worked on the Message Infrastructure team, where I imported RapidCheck, a Haskell QuickCheck inspired testing framework, into the Bloomberg C++ environment.
- May-Aug. Software Engineering Intern, PicMonkey, Seattle
  - 2016 I helped build the user interface and photo editing features for the launch of the mobile photo editor app in both **Android** and **iOS**.
